Education

Duke University

Durham, NC

B.S. in Computer Science

- **Coursework:** Data Structures, Design of Algorithms, Machine Learning, Artificial Intelligence, Natural Language Processing, Full-Stack IoT Systems (Graduate level), Computer Architecture, Database Systems, Data Science.
- **Honors & Leadership:** Full Scholarship; CS Department Representative at SHPE; BRASA@Duke Staff.

Experience

Incoming Data Analytics Fellow (Analyst, IT)

Durham, NC

Duke University

Starts Aug 2026

- Develop production data workflows, dimensional warehouse models, and dashboards for Duke and Duke Health research.

Founding Software Engineer (Backend)

Philadelphia, PA

Aquara.ai

Jul 2026–Present

- Build backend systems for an AWS-to-Azure database migration and authentication flows.

Software Engineer Intern

Sao Paulo, Brazil

BTG Pactual Bank

Jun–Aug 2025

- Built and shipped “Log in with BTG ID,” a production distributed SSO service giving 6,000+ employees and 8,000+ small-business clients one authentication path across BTG Pay products.
- Cut authentication latency 47% toward a 1-second target by caching session state in Redis.
- Personalized content on EXAME, BTG’s news platform by connecting GraphQL banking-profile data to the OAuth 2.0 flow.
- Owned rollout and reliability: authored the RFC, shipped behind feature flags, and restored service within SLA by leading incident triage with live telemetry and fallback.

Technical Assistant, Prototyping & Fabrication

Durham, NC

Duke OIT Innovation Co-Lab Professional Services

Jun 2023–Dec 2024

- Cut 3D-printing turnaround from 3+ to 1–2 business days by managing end-to-end delivery for 24 stakeholders.
- Kept client satisfaction at 95% by producing 47 custom models for Duke Health research, standardizing production specifications.

Software Engineering and AI Mentee

New York City, NY

Microsoft and Persistent Systems

Jul–Aug 2024

- Cut healthy-food search time 85%, from 5 minutes to 45 seconds, with 80% task success by building MealPilot using Microsoft Copilot Studio and Azure Maps API.
- Selected as 1 of 18 students nationwide for the Microsoft NYC Summer Mentorship Program and AI Hackathon.

Software Engineer Intern (Code+ Program)

Durham, NC

Duke University

May–Jul 2024

- Saved Duke Facilities 2 hours per day on data requests by deploying a dashboard with REST API, Docker, Linux, and Postgres.
- Reached 95% precision on three-class occupancy classification and a cross-validated R-squared of 0.72 on regression by training scikit-learn models on 2M+ anonymized Wi-Fi and CO2 records.
- Built accessible, WCAG-aligned visualizations with Facilities across 4 Agile sprints to support HVAC planning.

Projects

- **RepSense AI (C/C++, ESP32, OpenAI API):** Built a system that streamed IMU data through the OpenAI API and displayed bench-press feedback on rep count, imbalance, tempo, and rest quality.
- **Can LLMs Unlearn? (Python, PyTorch):** Tested the ROME and MEMIT model-editing algorithms across GPT-2 models for targeted fact correction without full retraining.

Technical Skills

Languages: Python, C, C++, Java, JavaScript, TypeScript, Go, SQL.

Software & Data: Node.js, React, GraphQL, REST, PostgreSQL, Redis, Docker, Git, Linux, AWS, Azure, CI/CD, Playwright.

AI, Systems & Security: PyTorch, Scikit-Learn, OpenAI API, HTTP, TCP/IP, Microsoft Entra ID, OAuth 2.0, OIDC, PKCE.
